

Activity - 2015

Much work was accomplished in the three Flinders Ranges regions this year (south, central and north), as demonstrated below. DEWNR supplied new signs for the summit of Mt Brown and generous gifts from others have been put to good use in the Flinders. In the Barossa, money has become available to replace decals and replace a few posts to re-mark the Goldfields walk. Some preliminaries have been undertaken in checking distances, locations and features.

For five years, WTSG has been providing interpretive leaflets for all the walks it cares for. In the Flinders we have printed 70 000, with several reprints of some, and 20 000 remain. This year we had a generous offer from the Friends of Flinders Ranges National Park to monitor and top up leaflet dispensers when they visit. This will be a great help.

◀ The first 2015 activity was replacing faded interpretation panels on Mt Brown in January. Here are some of the panels arriving at the summit tower. Supplied by DEWNR Northern and Yorke

The summit Checkpoint on the Dutchman was replaced by a topogram, with landscape features identified and a speculative origin for the name of the hill. Made possible through the generosity of June Boscence ▶

◀ Bunyeroo Trailhead was tidied, with gravel spread over worn areas. This was heavy work for a day. A leaflet box was installed for the laminated Gorge leaflets as a trial of 'use-and-return'

◀ The leaflets and Geosite markers along the walk were made possible through the generosity of Dr Barbara Hardy ▶

Here is the finished Trailhead. Out of 48 Gorge leaflets, only 38 remained after a fortnight. We hope some good dollars went into the bollard! ▶

◀ Asset check at Yuluna. In the absence of strong males, strong females enjoy the challenge of removing fallen trees.

A new recruit paints posts at Youngoona Hut. More to be done in 2016 ▶

◀ A minor re-route of the Trezona walk at Etina Creek was made to avoid an eagle's nest; some re-marking was needed

Assets have to be checked wherever, however. At Terrapinna it's not straightforward – the second fall can be daunting ▶

◀ Young Bell-fruit Trees seen last year on Arkaroola, were fruiting this year. Good to see . . . always at top of tree

End of day. The Group packs up at Koolamon Camp and heads for home ▶

◀ In the Barossa goldfield we believe a Geopost could do this job and have space for a story

The feature is good - safe inside - it gets regular use, but we're not sure by whom . . . kids? creatures of the night? ▶
